

Two Truths and a Lie: Bat Edition

Directions: Read the three phrases for each round. They include two true facts about bats and one false statement/common misconception (green = true, red = lie). The participants guess which one is the lie, and one point awarded for each correct answer. Whoever has the most points at the end of the game, wins!

Round 1

- bats are not blind
- bats are nocturnal
- most bats suck blood

Round 2

- bats use echolocation to find their way around at night
- bats are one of three different kinds of flying mammals
- one singular bat can eat more than 1,000 mosquitoes in an hour

Round 3

- the smallest known bat is about the size of a bumblebee
- bats are very closely related to rodents
- the largest bat is called the flying badger

Round 4

- female bats give birth to more than 4 babies at a time
- baby bats are called pups
- most bats live to be 30 years old

Round 5

- there are over 1,000 different kinds of bats
- bats are important to have and should not go extinct
- bats serve no real purpose and it would not matter if they went extinct
